MINI PROJECT SYNOPSIS

(Academic Year 2026-2027)

Project Group Id	
Title of the Project	**FeeAssist AI :** A Multilingual and Voice-Enabled Personalized Fee Query Assistant Using Natural Language Processing and Machine Learning
Project Domain	Artificial Intelligence – Natural Language Processing (NLP) / Machine Learning / Conversational AI (optional)
Problem Statement	Students often need details about their college fees. They want to know the fee, how much they have paid how much is left any scholarships that have been applied their payment history and when the next payment is due. Traditional fee management systems usually make students go through set steps or talk to staff to get answers to their questions. These systems might not offer a way to ask questions support different languages or give answers that match each students own fee details. The system being suggested is called FeeAssist AI. It is meant to create a helper for fee questions. This helper lets students who are logged in keep their fee information. Ask questions, about fees using normal words. The system uses language understanding and smart learning to figure out what the student is asking. Then the back end gets the students fee details. Does the math needed. The system works in English, Hindi and Marathi. It also offers voice help if needed. If the system is not sure of the answer or the question is hard it uses a controlled system based on Gemini to help. All the real fee data and calculations stay safe inside the app.

Aim of the Project	The goal of the project is to create an assistant that is personalized supports multiple languages and can be used with voice. This assistant will help students get details, about their fee records by using natural language. Students will be able to ask questions in a way that feels like a conversation and receive clear correct answers. The system will be

	designed to understand languages and respond using spoken words making it easy to use for everyone.
Name of Students in the Project Group with their signatures	1. Aman Firojkhan Pathan[UIT3M1104] 2. Atharv Sakharam Patil [UIT23M1105] 3. Hitesh Dattatraya Patil [UIT23M1106] 4. Sahil Ashok Pawar [UIT23M1107]
Name of the Guide with Signature	Dr. S. A. Thanekar
